

Kendall Deegan

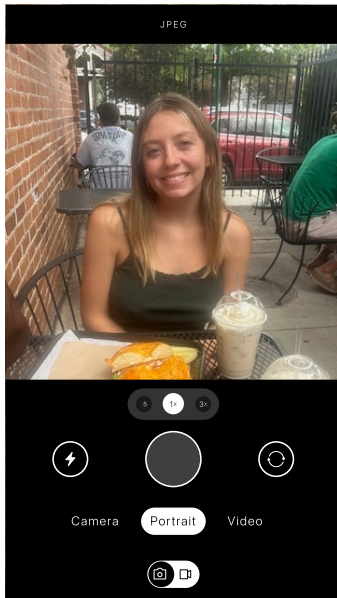

Career Goals

I am a marketing major, and my dream job is to work in social media marketing at a ski resort!

Technical Background

I am okay with computers. I have always used Apple products, but recently, in my internship over the summer, I used a Windows computer and have become way more proficient on that with things like Microsoft Excel and Word.

My Background

I am originally from Michigan; however, I moved in fifth grade and grew up in San Jose, California. I came to Reno for school because I love snowboarding, and it was the perfect distance from home. I have the Epic Pass, so I usually snowboard at Heavenly, Kirkwood, and Northstar. I am really into indie music right now and just got a record player. I enjoy listening to artists like Clairo and Mac DeMarco. I can't wait to explore the country after I am done with school and figure out where I want to live. I just got a Siamese cat in February named Pepper and she is my bestie!
